

PATRAN

PATRAN® and SlideShield use in radiology

Jamar Health Products, Inc., offers two products to protect radiology workers and the high-tech equipment they use each day.

PATRAN slide sheets reduce friction making it easier to laterally transfer patients from cart to imaging table, position patients in all directions on CT and MRI machines and insert portable x-ray cassettes.

When inserting the PATRAN, it isn't necessary to log-roll most patients. Often when patients come into radiology, they are fragile from broken bones or internal injuries, or the condition of the patient is not yet known. There is a heightened need to keep a patient still and comfortable.

The SlideShield x-ray cassette cover protects portable cassettes from damage by bodily fluids and prevents cross-infection between patients.

For more questions, visit www.patran.net or call us at (414) 529-5175.

PRODUCT #/NAME	SIZE (INCHES)	COLOR	PACKAGING/REMARKS
1845/PATRANbari	78x45	Pink	20/Box
8377/PATRAN	72x36	Royal Blue	25/Box
