Compact and flexible, PATRAN® slide sheets ready to assist in emergency

Whether treatment is provided by emergency medical technicians/paramedics on site or during transport or at a hospital in the Emergency or Trauma departments, PATRAN® slide sheets can help protect emergency professionals from injury and make moving more comfortable for the patient.

Common uses for emergency responders with PATRAN slide sheets include:

- Helping a patient who has fallen in a tight space, such as in a bathroom or between a bed and a wall.
- Laterally transferring a patient onto an emergency cart or from an emergency cart to a hospital cart.
- Inserting without log-rolling a to keep a patient stable who has evidence of a spinal injury, broken bones, or other trauma.

The lightweight and compact size of PATRAN slide sheets make them easy to stock on ambulance and air medical transport vehicles, ED carts and medical supply kits.
