SLIDE TO SAFETY

## PATRANbari Single Patient Use Slide Sheet

*Jamar Health Products, Inc., produces the largest variety of single-patient, multiple-use slide sheets. We are the leader in this category of safe patient handling devices.*

### Safe patient handling

PATRANbari reduces caregiver injuries, provides patient comfort, reduces skin shear and eliminates cross infection. It is used for lateral transfer, repositioning, turning and many other patient-handling tasks. Log-rolling the patient isn't required when using PATRANbari. Using PATRAN<sup>®</sup> products has cut workers' compensation costs related to moving patients by more than 75 percent.

### No weight limit

This slide sheet measures 78"x45" so it is a bit longer, wider and thicker than other PATRAN slide sheets. There is no limit to the weight of a patient who can be moved with PATRANbari. However, caregiver standards should be considered as it takes more effort and more people to safely move a 700-lb. patient than a 300-lb. patient.

### Nondirectional

PATRANbari is slippery and moves in all directions. Use it to assist with more than 20 different patient handling tasks.

### Number of uses

PATRANbari can be used more than 30 times with the same patient.

### Convenient

PATRANbari is individually folded so it can be carried or put in a patient's room. Any PATRANbari product can be made into Solo or Pocket style slide sheets.\* Solos are individually bagged versions. Pockets are more compactly folded and individually bagged to fit in a caregiver's pocket or a tight space. Wall dispensers are also available. Having PATRANbari close at hand is critical to compliance.

*\*Additional lead time may be necessary and pricing will be higher with special option requests.*

### Training

Training is important. We offer written and video instructions.

### Warranty

Jamar Health Products, Inc., will replace any defective PATRAN products for a period of two years from the date of purchase. The warranty includes freight within the USA.
