

# PATRAN<sup>®</sup> app

## COMPRESSION HOSE APPLICATOR

PATRANapp is a compression hose applicator made of our slippery and thin, yet strong PATRAN slide sheet material. Caregivers can use PATRANapp in the inpatient setting to make it easier to slide compression hose on a patient and take them off while reducing skin shear.

Difficulty getting compression hose on is a major reason for patients' non-compliance. Give PATRANapp to patients upon discharge or hand them out in clinics to make putting on hose easier for their home caregivers. If the patient can reach his feet and just needs a little extra help sliding stockings up, PATRANapp can come in handy.

PATRANapp comes individually packaged with instructions showing simple steps to use the product. You can also find how-to videos online.

For more information, visit [www.patran.net](http://www.patran.net) or call us at (414) 529-5175.

PRODUCT NUMBER/NAME	COLOR	PACKAGING/REMARKS
5137/PATRANapp	Royal Blue	25/Box (each PATRANapp is in a resealable bag with instructions)
