

PATRAN®

JAMAR HEALTH PRODUCTS, INC.

PATRAN® Single-Patient Use Slide Sheet

Jamar Health Products invented and introduced PATRAN® slide sheets in 1981. We are the leader in this technology.

Safe patient handling

PATRAN® reduces caregiver injuries, provides patient comfort, reduces skin shear and eliminates cross-infection. It is used for lateral transfer, repositioning, turning and many other patient-handling tasks. Log-rolling the patient isn't required when using PATRAN. Using PATRAN has cut workers' compensation costs related to moving patients by more than 75%. PATRAN products are a good start in any safe patient-handling program.

No weight limit

There is no limit to the weight of a patient who can be moved with PATRAN. However, caregiver standards should be considered as it takes more effort to move a 700-lb patient than a 200-lb patient.

Nondirectional

PATRAN is slippery and moves in all directions. Use it to assist with over 25 different patient-handling tasks.

Number of uses

PATRAN can be used about 50 times with the same patient.

Convenient

PATRAN is individually folded. It can be carried or put in a patient's drawer. PATRAN wall dispensers are available. Having PATRAN close at hand is critical to compliance.

Variety

PATRAN comes in a variety of styles and sizes so a patient's medical condition and mobility can be considered. From emergency to the imaging and surgical areas, medical floors or rehab, there's a PATRAN product.

Training

Training is important. We offer written and video instructions.

Warranty

Jamar Health Products warrants that all products will be free from any defects and conform to purchase order specifications.

PRODUCT	ITEM #	SIZE (INCHES)	COLOR	PACKAGING/REMARKS
PATRANpro	8377	72x36	Blue	25/box
PATRANpro	8378	72x36	Lime Green	25/box
